Budap	1930	-5-9	1(1931)
est	1929	-7-6	+ 0-8
Vienna	1929	-6-7	-5-0
Lodz	192	+ 1-5	+ 10-5
Palesti	9	+ 22-	
Tunis .	1930	+ 17-7	+ 18-0

In Palestine, where more than half of the present Jewish population are new-comers since 1920, the percentage of persons of the reproductive age is specially high (as in all countries receiving immigrants), and the birth-rate and natural increase among the Jews is greater than in any other country; but also the natural increase of the non-Jews is higher than anywhere else in the world.

Next to Palestine, come Carpatho-Kussia, Tunis, Soviet Kussia, and Bulgaria, where the Jews have a yearly natural increase of 20-5, 17-7, 15*5, and 11-1 per 1000. In all other countries their natural increase is below 10 per 1000.

The numbers of world-Jewry rose:
